

DSTA SCHOLARSHIP

Turn ideas into innovations and dreams into reality

With the DSTA Scholarship, you can look forward to a fulfilling and meaningful career at the forefront of science and technology. You will be entrusted to create the future of our nation's defence and security, and grow in a collaborative and dynamic environment where innovation thrives.

Upon graduation, there will be opportunities to pursue a career in engineering, infocomm technology and cybersecurity where you can grow professionally and personally. Embark on an exciting and rewarding journey with the DSTA Scholarship and discover how you can be the transformative force behind our nation's defence and security.

DEFENCE SCIENCE AND TECHNOLOGY AGENCY (DSTA)

DSTA develops leading-edge technological and engineering solutions for the defence and security of Singapore. Our diverse portfolio includes military platforms, weapons, sensors, networked systems, data analytics, the Internet of Things, cybersecurity, IT and building and infrastructure. The multi-disciplinary nature of our work will give you many opportunities to innovate and push the boundaries of science and technology.

Pang Yi Wei
DSTA Scholar
Engineer
Enterprise IT, DSTA

I have always had a passion for science and technology, and the idea of applying it to improve the lives of fellow Singaporeans greatly intrigues me. The DSTA Scholarship has enabled me to pursue my passion in engineering, and as a defence engineer now, I harness the latest innovations and technologies to strengthen Singapore's defence and security.

I am currently working on the design and development of enterprise architectures that could tap cloud computing for enhanced efficiency and effectiveness. My role has also given me opportunities to collaborate with global technology firms. Being able to work with advanced technologies and like-minded teammates to solve real-world challenges have made my journey in DSTA a most rewarding one.
