DSTA AND DIGANTARA PARTNER
TO ADVANCE IN SPACE SITUATIONAL AWARENESS

Bengaluru / Singapore, 2 Feb 2026 — Singapore's Defence Science and Technology Agency (DSTA) and Digantara Industries, a leading space surveillance and intelligence company, today announced a partnership to co-develop tools in the area of Space Situational Awareness (SSA) in support of the National Space Agency of Singapore, as part of Singapore's broader space efforts.

Leveraging Digantara's expertise in space and ground-based sensing infrastructure, both parties will focus on the development, testing, and evaluation of software applications that enhance the accuracy and effectiveness of satellite tracking. This collaboration in the emerging domain of SSA would bring fresh perspectives and technical insights from an innovative company like Digantara. This includes integrating Digantara's sensor data with AI-driven analytics.

The collaboration aims to provide a more comprehensive view of Singapore's satellites that supports the safety and long-term operability in an increasingly congested orbital environment. Through this partnership, Digantara will contribute its technical expertise to support Singapore's space situational awareness efforts.

This partnership was announced on the sidelines of Space Summit 2026.

About Defence Science and Technology Agency:

The Defence Science and Technology Agency (DSTA) is a leading technology organisation that drives innovation and delivers state-of-the-art capabilities to make the Singapore Armed Forces a formidable fighting force. Harnessing and exploiting science and technology, our engineers and IT professionals leverage multidisciplinary expertise to equip our soldiers with advanced systems to defend Singapore. DSTA also contributes its technological expertise to support national-level developments. To achieve our mission, DSTA excels in systems engineering, digitalised platforms, cyber, software development and more.

Visit www.dsta.gov.sg for more information.

About Digantara Industries:

Digantara Industries, founded by Anirudh Sharma in 2020, is a space surveillance and intelligence company dedicated to protecting and defending sovereign and allied interests across operational domains from emerging threats while ensuring safety, security, and long-term sustainability. By integrating advanced space-based sensors, proprietary optics, and AI-driven analytics into a unified space-intelligence infrastructure, Digantara delivers the comprehensive domain awareness required to safeguard critical assets and maintain strategic superiority.
