Discover The Unseen Edge

DSTA Technology
Undergraduate Programme

Get A Head Start in Defence Technology

Behind Singapore's defence lies a world of advanced technology, bold ideas and people solving challenges that matter.

For top Year 2 undergraduates in Engineering, Computing, Information, or Digital Technology, this is your early invitation into the work that keeps Singapore secure.

Through hands-on experience, industry exposure, and a head start on future opportunities, discover where your skills can make a real impact. From here, you will pave your way to a career that redefines the limits of what is possible.

This is where you discover the unseen edge.

With Tech UP, You'll...

Gain Hands-on Industry Experience

Step into an **internship project** that stretches your abilities. Work on real initiatives guided by experienced mentors.

Broaden Your Technical Horizons

Explore curated **tech courses** alongside DSTA engineers and technologists. Broaden your knowledge across new domains while deepening your expertise.

Connect With The Industry

Gain first-hand insights into our work at **exclusive events** while connecting with engineers and tech leaders shaping defence technology.

Shape Your Career Direction

Discover **career opportunities** with DSTA ahead of graduation and gain a clearer sense of where your skills and interests could take you.

Your Path to Defence Tech Starts Here

Where the unseen edge is revealed.
